

Journey to enable EUDR compliance

Leading systemic change and developing enhanced technologies to help companies meet EU Regulation on Deforestation-free Products (EUDR) requirements

JUNE 2023:

The EU brings the Deforestation-free Products Regulation into force as the EUDR

FSC is the most credible global sustainable forestry solution. FSC delivers on numerous EUDR requirements.

FSC FOREST MANAGEMENT CERTIFICATION and products with the **FSC 100%** label meet the majority of EUDR requirements.

FSC CHAIN OF CUSTODY CERTIFICATION and products with the **FSC MIX** label meet numerous EUDR requirements.

Products with the **FSC RECYCLED** label are **exempt** as they do not include any virgin forest material.

JUNE 2024:

The **FSC EUDR TOOLBOX** will enable companies, operators, and traders throughout forest supply chains to meet their EUDR obligations

FSC BLOCKCHAIN enables companies to track the material's journey through the entire supply chain and meet EUDR **traceability** requirements.

FSC REGULATORY MODULE will provide additional requirements enabling companies to meet **EUDR deforestation, degradation, and legality** requirements and generate the required due diligence report.

FSC RISK MANAGEMENT FRAMEWORK will provide revised **risk assessments** aligned with the EUDR, relieving certified and non-certified operators from significant effort.

From January 2025 the first of **FSC's NEXT GENERATION RISK ASSESSMENTS**, covering all EUDR requirements, become available, providing one standardized Risk Assessment for each prioritized country.

THREE STEPS TO COMPLIANCE

- 1

Become an early adopter of FSC Blockchain.
Working towards onboarding Certificate Holders from March 2024
- 2

Receive training and support.
From March 2024 onward
- 3

Implement FSC EUDR tools.
Available from July 2024

Meet EUDR obligations.
Deadline 30 December 2024
